SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/22/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

09/419,752

Applicant(s)

LAM, PETER AR-FU

Examiner

Angela A. Armstrong

Art Unit

2626

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 86-176 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 86-176 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☐ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application
- ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 86-176 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
3. Claims 86-176 define non-statutory processes because they merely manipulate an abstract idea (data tables) without a claimed limitation to a practical application. The disclosed invention has a practical application in the technological arts; however, the claimed process, a series of steps to be performed on a computer, simply manipulates an abstract idea without a claimed limitation to a practical application and does not have any post or pre- computer process activity.

A review of application 09/419,752 shows the disclosed invention thereof to be a method for programming a computing device. This is a practical application within the technological arts. However, it does not disclose specific hardware, specific software, or a combination thereof for performing the claimed functions. The claims, each taken as a whole, are directed to an abstract idea that is not applied to or limited by other physical elements or process steps. In the instant application the disclosure is directed to any and every structure for carrying out the claimed functions, and not solely to specific structure for performing the claimed functions.

The claims, each taken as a whole, are directed to an abstract idea that is not applied to or limited by other physical elements or process steps.

Claims 86-176 reviewed in light of the specification, simply recite a sequence of steps to execute one or more events.

Claim 176 is written in means-plus-function format, and for the purpose of this rejection are being treated as though they were method claims. The courts have held that such treatment is acceptable:

"If the functionally-defined disclosed means and their equivalents are so broad that they encompass any and every means for performing the recited functions, the apparatus claim is an attempt to exalt form over substance since the claim is really to the method or series of functions itself. In computer-related inventions, the recited means often perform the functions of "number crunching" (solving mathematical algorithms and making calculations). In such cases the burden must be placed on the applicant to demonstrate that the claim is truly drawn to specific apparatus distinct from other apparatus capable of performing the identical functions."

If this burden has not been discharged, the apparatus will be treated as if it were drawn to the method or process, which encompasses all of the claimed "means." See *In re Abele* 214 USPQ 682, 688 (CCPA 1982); *Ex parte Akamatsu*, 22 USPQ 2d 1915, 1920; and *Ex parte Lappet*, 23 USPQ 2d 1340, 1344.

The specification does not disclose a specific hardware, software, or a combination thereof for performing the steps of specifying user defined custom expressions, defining x qualifying instructions etc. Claim 129 recites a first and second processor and computing means respectively however, these are only general computing devices.

Taking each claim as a whole, we have field of use limitations claim 86-176. These limitations do not in any way further limit the algorithm.

As per the claims, the language "A method to program a computing device", for example, does not transform the claimed subject matter into statutory subject matter. The recital is merely a field of use or desired end use limitation.

An abstract idea is not made statutory by "attempting to limit the use of the formula to a particular technological environment." Thus, "field of use" or "end of use" limitations in the claim preamble are insufficient to constitute a statutory process.

The above review of the claims shows that the subject matter claimed in addition to the abstract idea is not sufficient on its own to render the claims as a whole statutory.

Further, a review of each claim as a whole fails to show the transformation or reduction of subject matter to a different state or thing.

It is readily apparent that when claims 86-176 are each taken as a whole, the claims are directed to the preemption of an abstract idea and, thus, are non-statutory.

Response to Arguments

4. Applicant's arguments filed January 7, 2007, have been fully considered but they are not persuasive. Applicant argues easy Format is not an abstract concept. In response, the Examiner argues, claims 86-176 define non-statutory processes because the limitations of the claim language merely manipulate an abstract idea (data tables) without a claimed limitation to a practical application. Applicant argues practical applications of the claimed invention are identified. The Examiner cannot concur. As claimed, the limitations of the claim language merely manipulate an abstract idea (data tables) without a claimed limitation to a practical

Art Unit: 2626

application of Easy Format programming. Applicant argues the claimed invention provides pre-computer and post process activity. The Examiner cannot concur. As claimed, the limitations of the claim language of claims 86-176 do not provide for limitations of pre-computer process activity such as the requirements of the measurement of physical objects or activities so as to provide pre-computer process activity to be transformed outside of the computer into computer data. Applicant's claims do not provide any limitations that measure any physical objects or activities to be transformed outside of the computer into computer data. Applicant argues the claimed invention provides post process activity. The Examiner cannot concur. As claimed, the claim limitations of claims 86-176 do not provide for limitations of post process activity such that a physical act is performed outside of the computer independent of and following the steps to be performed by a computer program; where those acts involve the manipulation of tangible physical objects (also not provided for in the claim limitations) and results in the object having a different physical attribute or structure (not provided for in the claim limitations). Applicant argues the claimed invention provides a practical application that produces a useful, concrete and tangible result. The Examiner cannot concur. As claimed, the claim limitations of claims 86-176 do not provide for do not provide for limitations of pre-computer process activity such as the requirements of the measurement of physical objects or activities so as to provide pre-computer process activity to be transformed outside of the computer into computer data nor do the claims provide for limitations of post process activity such that a physical act is performed outside of the computer independent of and following the steps to be performed by a computer program; where those acts involve the manipulation of tangible physical objects (also not provided for in

Art Unit: 2626

the claim limitations) and results in the object having a different physical attribute or structure (not provided for in the claim limitations).

The claim limitations of claims 86-176 appear to be a computer program or series of steps performed by the computer. Applicant should note that claims directed to a claimed computer-readable medium encoded with a computer program (including limitations for a series of steps to be performed by the computer) is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer's functionality to be realized, and is thus statutory.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

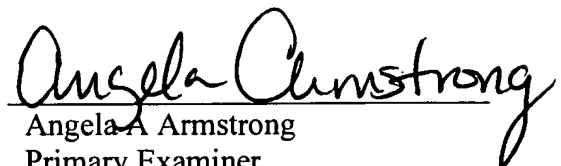

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
